Main Skills:

I've been working with React for the last two years and I'm currently improving some skills: Next.js, Gatsby.js and React Native. I love work with Storybook. And I also have a strong knowledge about HTML, CSS, JS, UX and UI. Wordpress, SEO, usability and acessibility as well. See all my skills here: https://www.diogorodrigues.dev/about

Some words about me:

Since 2009 I've been living and breathing web development and creating modern and user friendly interfaces. I've had the chance to immerse myself in many different works and projects, helping to make this world a little better through design & code. I've collaborated on great products for Nike Brazil, HP Brazil and International, HCSS and Call Source. Previously, I worked for Via Varejo - owner of large Brazilian ecommerces, such as Casas Bahia, Pão de Açúcar and Ponto Frio.
You can read more about me in my website: https://www.diogorodrigues.dev/about

Experience:

DYD CREATIVE SOLUTIONS
Frontend Developer
October 2018 - October 2020 (2 years 1 month)
Houston, Texas, United States
At DYD I worked as a front-end developer and web designer building amazing projects for web and mobile. I worked on the new HP Life e-learning platform built in 7 languages for people around the world. React, NextJS and Wordpress are the most famous technologies I worked with there.

Cnova
Front-end developer
August 2016 - September 2018 (2 years 2 months)
São Paulo, São Paulo, Brazil
E-commerces, UX planning and Scrum methodology. I've worked as a front-end developer planning and building projects based on UX testing in order to improve ecommerces. Cnova is part of Via Varejo (owner of large Brazilian ecommerces, such as Casas Bahia, Pão de Açúcar and Ponto Frio). I worked specially on the Nike Brazil ecommerce.

Trend-i
Front-End Developer
January 2015 - April 2016 (1 year 4 months)
São Paulo, São Paulo, Brazil
At Trendi I had great experiences with famous brands: Sistema Indústria (a government program), Sodimac (a famous ecommerce), TD Bank among others. There I worked as a front-end developer building a lot of projects based on a boilerplate that I created at that time: https://github.com/diogorodrigues/iceberg-boilerplate

Orkeo
Web Designer
October 2013 - December 2014 (1 year 3 months)
São Paulo, São Paulo, Brazil
I am very proud to have been part of this company. It was an application to help companies create their own corporate application. I worked at the startup since its inception, helping from the creation of branding to the implementation of interfaces and planning of marketing strategies. Wordpress, AngularJS and Hubspot were the technologies that I used most at the time.

OCTO TI
Web Designer
April 2009 - November 2012 (3 years 8 months)
São José do Rio Preto, São Paulo, Brazil
- Creation of layouts for institutional websites, virtual stores, blogs, business management systems, marketing emails and promotional banners.
- Facebook campaigns.
- HTML and CSS development following W3C standards and usability. Inclusion of effects with jQuery and application of SEO.
- Scrum methodology.
